

# **PALFINGER** HOOKLIFT

## *APPLICATION PROFILES*

### MUNICIPAL

Municipalities find that Hooklifts increase the utilization of their trucks by allowing them to easily switch between specialized bodies:

- Great for seasonal applications so you do not tie up a truck with specialized bodies year round.
- Specialized bodies include leaf removal, tree spraying, salt spreaders, recycling and bulk waste collection.
- We can modify an existing truck which is under utilized and convert it into a Hooklift truck to increase the truck's use.
